

Miter Saw 3045DS Bandsaw

THE SEAL OF ASSURANCE

The MiterSaw 3045DS is a double-column double-side mitre bandsaw that swivels both ways for angle cuts on pipe, channel and structural steel. At 90 degrees it cuts 300 mm round and 250 x 450 mm square, with hydraulic clamping and VFD blade speed from 15 to 100 m/min. The double-side swivel suits shops producing mitred frames and trusses that need angles cut left and right without re-fixturing.

SPECIFICATIONS

Type	Double-column double-side degree-cutting bandsaw	Cutting capacity 90 deg (round)	300 mm
Cutting capacity 90 deg (square)	250 x 450 mm	45 deg cutting (square)	300 x 300 mm
60 deg cutting (square)	250 x 225 mm	Blade size	4115 x 27 x 0.9 mm
Blade speed	15-100 m/min (VFD)	Saw motor	3 HP / 2.25 kW
Hydraulic motor	1 HP / 0.75 kW	Vice clamping	Hydraulic
Angle swivel	Manual, precision angle scale	Machine size	2270 x 1160 x 1660 mm
Weight	910 kg approx.		

APPLICATIONS

Double-side angle cutting · Pipe and channel cutting · Mitred frame and truss fabrication

INDUSTRIES

Steel service · Structural fabrication · Heavy fabrication
