

HT-MINI Channel-Letter Bender

THE SEAL OF ASSURANCE

The HT-MINI is the entry-level CNC channel-letter bender in the HT range, built for flat aluminium coil up to 100 mm high and 0.6 mm thick. It uses a rolling feed with planer-knife slotting and double-blade alternate bending, calibrating cut depth in software for +/-0.1 mm forming accuracy. It suits small shops producing standard illuminated letters from DXF files.

SPECIFICATIONS

Material height	10 to 100 mm	Material thickness	0.3 to 0.6 mm
Slotting method	Planer knife slotting system	Bending method	Double blade alternate bending system
Feeding method	Rolling feeding device	Accuracy	+/-0.1 mm
Cutting depth calibration	By software	Power	AC 220V / 55Hz / 1 KW
Air source	0.6 m3/min	Material supported	Flat aluminium
Input file format	.dxf		

APPLICATIONS

Forming flat aluminium channel letters · Small-format illuminated signage · Logo and lettering fabrication · Storefront sign production

INDUSTRIES

Signage and advertising · Sign fabrication shops · Retail and storefront branding · Outdoor advertising
